

SHIVENDRASINH RAJESHIRKE

Data Science | Machine Learning | AI Engineering

+91 9067672277 ✉ rajrajeshirke2277@gmail.com 📍 Kolhapur, Maharashtra
🐙 GitHub 🔗 LinkedIn 🌐 Portfolio

Professional Summary

Computer Science and Engineering (Data Science) graduate with hands-on experience in Machine Learning, Natural Language Processing, Deep Learning, and Data Analytics through internships and end-to-end AI projects. Skilled in Python, SQL, Scikit-learn, TensorFlow, Power BI, and transformer-based NLP systems with experience in predictive modeling, feature engineering, and analytics.

Technical Skills

Programming: Python, SQL

Machine Learning: Scikit-learn, Random Forest, Naive Bayes, Classification Models, Feature Engineering, Predictive Analytics, Model Evaluation, Time Series Forecasting

AI & NLP: Generative AI, LLMs, RAG, Prompt Engineering, NLTK, SpaCy, Transformers, LegalBERT, TF-IDF, Text Classification

Deep Learning: TensorFlow, Keras, CNNs

Analytics: Pandas, NumPy, Power BI, Matplotlib, Seaborn

Tools: Git, GitHub, Jupyter Notebook, Flask, Docker, PostgreSQL, DBMS

Experience

Technocolabs Softwares Inc.

Data Science Intern

- Engineered a Carrier Performance and SLA Risk Intelligence system using 100K+ logistics records.
- Performed EDA, feature engineering, and predictive modeling using Random Forest and Naive Bayes.
- Built risk-classification workflows for SLA breach prediction and shipment delay detection.
- Developed Power BI dashboards and KPI reports supporting operational decision making.

CodTech IT Solutions Private Limited

Machine Learning Intern

- Developed ML and NLP models using Decision Trees, Logistic Regression, and TF-IDF for classification tasks.
- Performed data preprocessing, feature engineering, and exploratory analysis on structured and unstructured datasets.
- Built CNN-based image classification models using TensorFlow/Keras and evaluated performance using standard metrics.
- Designed recommendation systems using collaborative filtering techniques for personalized suggestions.

Projects

AI-Based Legal Contract Risk Analyzer

NLP | LegalBERT | Transformers

- Developed an AI-powered legal contract intelligence platform for clause classification and risk assessment.
- Implemented TF-IDF, Logistic Regression, and LegalBERT models for automated contract analysis.
- Automated extraction of contractual clauses and legal risk indicators using NLP pipelines.

Carrier Performance & SLA Risk Intelligence

Machine Learning | Logistics Analytics

- Developed a machine learning solution for shipment delay and SLA breach prediction.
- Developed a user-friendly frontend and deployed the ML application on Railway for real-time predictions.
- Trained and evaluated Random Forest and Naive Bayes models for risk classification.

Employee Attrition Prediction System

Machine Learning | HR Analytics

- Developed a machine learning model to predict employee attrition using workforce and behavioral datasets.
- Performed feature analysis to identify key factors influencing employee turnover and retention.
- Evaluated classification models and generated workforce-planning insights.

Education

Kolhapur Institute of Technology, Kolhapur

2022 – 2026

B.Tech in Computer Science and Engineering (Data Science)

CGPA: 8.10

Vivekanand College, Kolhapur

2022

Higher Secondary Certificate (HSC)

76%

Radhabai Shinde English Medium School, Kolhapur

2020

Secondary School Certificate (SSC)

91%

Publication

- AI-Based Legal Contract Risk Analyzer, DOI: 10.5281/zenodo.20213767

Certifications

- LLM Engineering: Master AI, Large Language Models & Agents (In Progress)
- Introduction to Career Skills in Data Analytics
